

31 January - 1 February 2014  
**CODIVILLA-PUTTI RESEARCH CENTRE**  
**RIZZOLI ORTHOPAEDIC INSTITUTE**  
via Di Barbiano 1/10 – BOLOGNA (Italy)

**1<sup>st</sup> Congress**  
**ISPO ITALIA**

**ISPO (International Society for Prosthetics and Orthotics)** was founded in Copenhagen, Denmark in 1970 as a non-profit non-governmental Organization. It is a global multi-disciplinary organization which sets its aims at improving the quality of life of those requiring prostheses, orthoses and mobility aids among other auxiliary devices. Its members are orthopaedic technicians, physiotherapists, occupational therapists, manufacturers of orthopaedic centres, nurses, caretakers and bio-medical engineers in the rehabilitation sector. **ISPO** is currently present in over a hundred countries and works to improve the quality of life of persons with physical limitations in need of mobility aids.

The principal activities are:

- To promote relevant clinical research and practical execution based on resulting evidence;
- To facilitate the development of innovative and relevant technology;
- To conduct continuous high quality formation programmes;
- To provide international development guidelines for the formation of orthopaedic technicians;
- To publish information by means of magazines and other publications in print or digital form;
- To promote cooperation and idea exchange at an international level;

The structure of **ISPO** is based on the integration of national companies. Each member Company is independent and dedicates itself, within its own country, to the promotion of activities of the International Company. The member Companies elect their own representatives in the International Committee.

***ISPO Italia** was founded to provide a base for the collaboration and professional growth of persons who work, within our country, in the disabilities sector. Its registered offices is situated in the Rizzoli Orthopaedic Institute and is, currently, coordinated by a National Committee composed of those experts and professionals, from the relevant disciplines, who have made themselves available for the organization of the Founding Congress of the Company based in Bologna.*
